

High Quality Brake Oil

Aspect

DOT 3

Product Description

Goodyear ASPECT Dot 3 is a high quality, non-mineral fluid based on glycol ethers, and is formulated specifically for hydraulic brake systems. Its relatively high boiling point assures that it is safe for use within the brake system and can be mixed with other brake fluids with similar specifications.

Benefits

ASPECT provides the following benefits when used as recommended:

- Good protection against rust and corrosion
- Very good physical stability
- Very good efficiency even in prolonged usage
- Extra resistance to reduction in boiling point from moisture absorption
- Good rubber swell characteristics
- Compatible with seal rubbers

Application

ASPECT are modern synthetic fluids for all conventional drum brake and disc brake systems as well as hydraulic clutch - actuation systems operating under tough operating conditions and where brake fluids of such standards viz. DOT 3 are recommended.

These are specially tailored to achieve the critical viscosity temperature characteristics needed in Brake systems.

Properties

The Hygroscopic properties of Goodyear Aspect Brake and Clutch fluids absorbs water that slowly lowers the boiling point. It is recommended that brake and clutch fluid is refreshed every two years.

Typical Characteristics

ASPECT	DOT 3	PERFORMANCE LEVEL- MEETS
Specific Gravity @ 20°C	1.04	SAJ 1703,
Color	Natural	Federal Motor Vehicle Safety Standard
pH Value	7-8.5	(FMVSS) 116 /DOT 3
ERBP, Deg C (Dry)	29	ISO 4925
ERBP, Deg C (Wet)	152	
Viscosity at - 40°C, cSt	1365	
Viscosity at 100°C, cSt	2.2	

Typical physical characteristics of ASPECT are given in the table. These are intended as a guide to the industry and are not necessarily manufacturing or marketing specifications.

Health & Safety

Detailed health and safety information for this product is provided in a Material Safety Data Sheet which is available upon request from your Goodyear lubricants sales office, or via the Internet on www.goodyearlubricants.me
